Contaminated Powered Infant Formula

The Risks to Premature Newborn Babies

Powdered infant formula is not sterile.

Powdered infant formula may contain a bacteria called *Cronobacter/Enterobacter Sakazakii* (E. Sakazakii or "E. sak" for short).

- [Babies with compromised immune systems](#)

Often these infants have been diagnosed with Meningitis, Salmonella, Sepsis or Bacteraemia. These illnesses can be caused by the bacteria E. sak. Review the [USEFUL RESOURCES](#) section of this page – both video and print articles – because they will give you a better idea of the nature of the problem and the risks involved. The Law Offices of Nick Stein have skilled [product liability lawyers](#) to assist you!

Contact us or call us at 800.948.6002 if you have additional questions about cases involving contaminated powdered infant formula.
